Color tokens

One accent. Score colors are semantic and always paired with a glyph and a word. Every text pair below passes 4.5:1; rings and meters pass 3:1.

Light

	bg	#F6F6F3	Screen and sheet background
	surface	#FFFFFF	Cards, rows, chips
	fill	#EFEFEC	Icon buttons, placeholders
	border	#E2E2DE	1 pt card borders, separators
	text	#1C1C1E	15.7:1 on bg
	text-secondary	#5E6166	5.7:1 on bg
	text-tertiary	#6E7176	4.5:1 on bg, chevrons, fine print
	accent	#0E6B4E	Buttons, links, selection. 6.5:1 with white
	accent-tint	#E3F0EA	Secondary button, selected chip

Dark

	bg	#1A1B1D	Soft charcoal, not pure black
	surface	#25272A	Cards, rows, chips
	fill	#2E3034	Icon buttons, placeholders
	border	#3A3D41	Card borders, separators
	text	#ECECEA	14.6:1 on bg
	text-secondary	#A5A8AD	6.3:1 on surface
	text-tertiary	#8E9196	4.7:1 on surface
	accent	#5DBB93	Text on it uses #0F1A15 (7.6:1)
	accent-tint	#1E3229	Secondary button, selected chip

Score tiers

Great choice

75–100 · glyph: check

ring #2E8A66 · tint #E5F2E9 · fg #1D6A41
dark: #5DBF85 · #1F3328 · #7FD3A2

Fine in moderation

50–74 · glyph: dash

ring #C28A12 · tint #FAF0D7 · fg #7A5600
dark: #E8B84A · #3A3020 · #F0C565

Eat occasionally

25–49 · glyph: exclamation

ring #D06A2A · tint #FCE7D8 · fg #9A4511
dark: #EE9459 · #3D2A1E · #F4A472

Eat rarely

0–24 · glyph: triangle

ring #B8463F · tint #F8E2DF · fg #9C2F28
dark: #E2766D · #3E2423 · #F0948C

Tiers also differ in lightness (amber lightest, red darkest), so they stay apart in greyscale. Under red-green colour blindness green and orange converge, which is why the glyph, the number and the word are required on every score.

Type and spacing

SF Pro through system text styles, so Dynamic Type works for free. Three weights: Regular 400, Semibold 600, Bold 700. Sizes are the iOS defaults at the Large setting.

Sample	Text style	Size / leading	Used for
History	`.largeTitle`	34 / 41 Bold	Tab screen titles
Quaker Oats	`.title2`	22 / 28 Bold	Product name, sheet and state titles
Great choice	`.title3`	20 / 25 Semibold	Verdict, section headings
Nutrition	`.headline`	17 / 22 Semibold	Row titles, buttons, values
Saturated fat	`.body`	17 / 22 Regular	Row labels, explanations
Low sugar	`.subheadline`	15 / 20 Regular	Chips, brand, verdict line, summaries
per 100 g · High	`.footnote`	13 / 18 Reg, Semi	Captions, status pills, group labels
Scan · of 100	`.caption2`	11 / 13 Semibold	Tab labels, unit under the score
86	`custom`	32 / 34 Bold	Score numeral, tabular figures, scales relative to .title

Spacing (8 pt grid)

`xxs 4`	glyph to label
`xs 8`	chip gap, button group
`sm 12`	icon to text in rows
`md 16`	card padding (rows)
`lg 20`	screen margins, score card
`xl 24`	between groups
`2xl 32`	between sections
`3xl 40`	bottom of scroll

Shape

16 cards, grouped lists

14 buttons, product image

10 thumbnails, segmented control

capsule chips, pills, tab bar

system sheets use the iOS default corner

Separation is a 1 pt border, never a shadow. Dark Mode uses the surface step instead and keeps a faint border.

Motion and haptics

Barcode lock	Frame turns accent, 200 ms ease-out + .success haptic
Result sheet	Medium detent with skeleton, then large; system spring
Score	Ring and number count up together, 300 ms ease-out
Accordion	Height + chevron rotate, 250 ms
Save	Bookmark fills, .light impact
Not found	.warning haptic, no shake
Reduce Motion	Cross-fade only, score appears without counting

Components

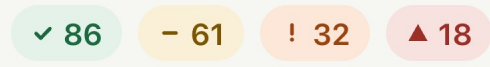

Rendered on the light tokens. Every tappable element has a 44 × 44 pt hit area even when it draws smaller.

Score ring

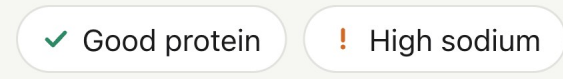

- 92 pt ring, 8 pt stroke, round cap, starts at 12 o'clock
- Track = tier tint, arc = tier ring color
- Numeral + "of 100" + glyph + verdict word always shown together
- VoiceOver: one element, "Score 62 of 100, fine in moderation"

Score badge (lists, cards)

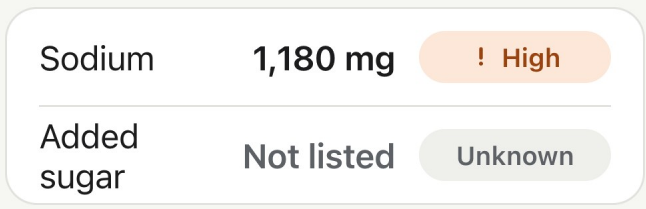

- Capsule, 28 pt tall, 10 pt side padding
- Tint fill + fg text (5.4–5.9:1), 12 pt tier glyph
- Tabular numerals so lists align

Highlight chip

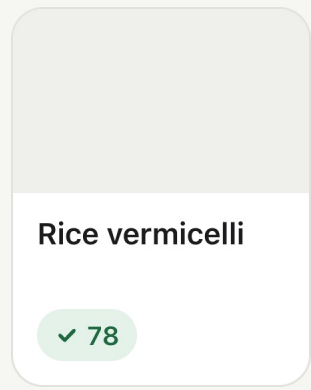

- 34 pt visual, 44 pt hit area, wraps to 2 lines max
- Neutral surface; only the glyph carries color
- Max 4. Order: concerns first, then positives
- Tap scrolls to and highlights the matching nutrition row

Nutrition row

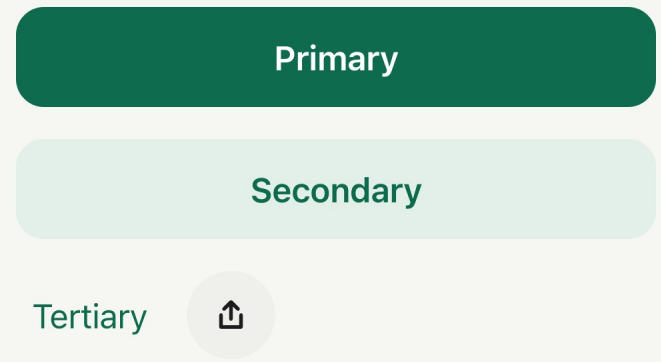

- 48 pt min height, grows with Dynamic Type
- Statuses: Low · Moderate · High · Good · Unknown
- At accessibility sizes the pill drops under the value

Alternative card

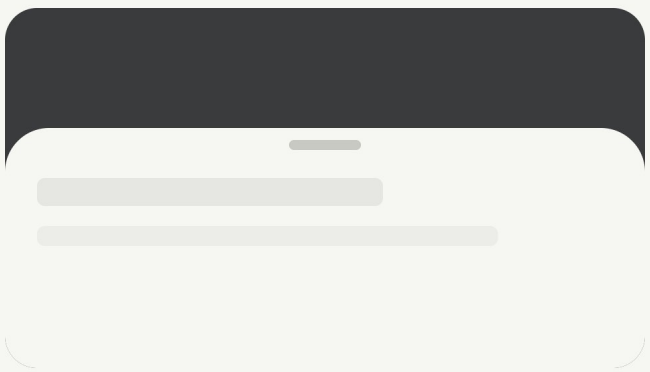

- 148 pt wide, horizontal scroll, next card peeks
- Only same-category products scoring at least 10 higher
- Shown above details when score is under 50

Buttons

- 50 pt, radius 14, full width in sheets
- One primary per screen
- Pressed: 0.85 opacity; disabled: fill token, text-tertiary

Bottom sheet

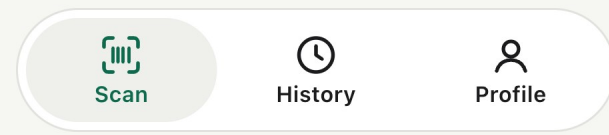

- System sheet with visible grabber, medium + large detents
- Result: opens medium, expands to large on load
- Swipe down or close button returns to the live camera

Section header (accordion)

- Summary on the right answers the question without opening
- Matches your profile? Summary turns into a warning line
- aria-expanded / accessibilityValue "collapsed"

Tab bar

- Use the native TabView; on iOS 26 it draws this floating glass bar itself
- Scan · History · Profile (About moves into Profile)
- Over the camera it switches to the dark material
