TBHQ

Tert-butylhydroquinone · INS 319

Concern level — Some concern

Low | **Some** | Higher

What it is

An antioxidant that stops oils and fats from going rancid, so packaged food keeps longer.

What's known

Permitted in India within set limits. Regulators set a safe daily intake of 0.7 mg per kg of body weight. Some animal studies at high doses raised questions, which is why it isn't rated low.

Often found in

Instant noodles, fried snacks, some cooking oils.
